This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently amended) A subscriber terminal ~~for a radio system,~~ comprising:

a transceiver configured to receive calls and messages;

a control unit connected to the transceiver configured to save received unanswered call data, save received messages, and to constitute a collection of contact attempts including both received unanswered call data and at least one saved <u>text</u> message by combining together the unanswered call data and messages which both refer to the same caller; and

a user interface connected to the control unit configured to present the contact attempts.

2. (Canceled)

3. (Previously presented) The subscriber terminal of claim 1, wherein the control unit is configured to find a reference to the same caller if both the unanswered call data and the message both contain the same caller identifier.

4. (Original) The subscriber terminal of claim 1, wherein the control unit is configured to display in the user interface the contact attempts as a list of contact attempts.

5. (Original) The subscriber terminal of claim 4, wherein the control unit is configured to display the list of contact attempts as a list of callers.

6. (Original) The subscriber terminal of claim 1, wherein the control unit is configured to receive a selection regarding a contact attempt from the user interface and to display the selected contact attempt in more detail in the user interface.

7. (Original) The subscriber terminal of claim 1, wherein the control unit is configured to fetch a name for the caller present in the contact attempts from a phonebook and to display the name of the caller in the user interface.

2

8. (Original) The subscriber terminal of claim 1, wherein the control unit is configured to display in the user interface a selection mechanism, which, when selected, makes a contact to a caller of the selected contact attempt.

9. (Canceled)

10. (Currently amended) An arrangement comprising:

receiving means for receiving calls and messages;

saving means for saving received unanswered call data and saving received messages;

constituting means for constituting a collection of contact attempts including both received unanswered call data and at least one saved text message by combining together the unanswered call data and messages which both refer to the same caller; and

presenting means for presenting the contact attempts.

11. (Canceled)

12. (Previously presented) The arrangement of claim 10, wherein the constituting means finds a reference to the same caller if both the unanswered call data and the message both contain the same caller identifier.

13. (Original) The arrangement of claim 10, wherein presenting means displays the contact attempts as a list of contact attempts.

14. (Original) The arrangement of claim 13, wherein the presenting means displays the list of contact attempts as a list of callers.

15. (Original) The arrangement of claim 10, wherein the presenting means receives a selection regarding a contact attempt and displays the selected contact attempt in more detail.

3

16. (Original) The arrangement of claim 10, wherein the presenting means fetches a name for the caller present in the contact attempts from a phonebook and displays the name of the caller.

17. (Original) The arrangement of claim 10, wherein the presenting means displays a selection mechanism, which, when selected, makes a contact to a caller of the selected contact attempt.

18. (Canceled)

19. (Currently amended) A method comprising:

        receiving calls and messages;

        saving received unanswered call data and received messages;

        constituting a collection of contact attempts including both received unanswered call data and at least one saved <u>text</u> message by combining together the unanswered call data and messages which both refer to the same caller; and

        presenting the contact attempts.

20. (Canceled)

21. (Currently amended) The method of claim <u>19</u>~~21~~, wherein a reference to the same caller is found if both the unanswered call data and the message both contain the same caller identifier.

22. (Original) The method of claim 19, further comprising: displaying the contact attempts as a list of contact attempts.

23. (Original) The method of claim 22, further comprising: displaying the list of contact attempts as a list of callers.

24. (Original) The method of claim 19, further comprising: receiving a selection regarding a contact attempt and displaying the selected contact attempt in more detail.

4

25. (Original) The method of claim 19, further comprising: fetching a name for the caller present in the contact attempts and displaying the name of the caller.

26. (Original) The method of claim 19, further comprising: displaying a selection mechanism, which, when selected, makes a contact to a caller of the selected contact attempt.

27. (Canceled)

28. (Currently amended) A computer program storage distribution medium readable by a computer and encoding a computer program of instructions for executing a computer process for presenting contact attempts to a subscriber terminal of a radio system, the process comprising:

 saving received unanswered call data and received messages;

 constituting a collection of contact attempts including both received unanswered call data and at least one saved text message by combining together the unanswered call data and messages which both refer to the same caller; and

 presenting the contact attempts with a user interface of the subscriber terminal.

29. (Canceled)

30. (Currently amended) The computer program storage distribution medium of claim 2830, wherein a reference to the same caller is found if both the unanswered call data and the message both contain the same caller identifier.

31. (Currently amended) The computer program storage distribution medium of claim 28, further comprising: displaying the contact attempts as a list of contact attempts with the user interface.

5

32. (Currently amended) The computer program storage ~~distribution~~ medium of claim 31, further comprising: displaying the list of contact attempts as a list of callers with the user interface.

33. (Currently amended) The computer program storage ~~distribution~~ medium of claim 28, further comprising: receiving a selection regarding a contact attempt and displaying the selected contact attempt in more detail with the user interface.

34. (Currently amended) The computer program storage ~~distribution~~ medium of claim 28, further comprising: fetching a name for the caller present in the contact attempts and displaying the name of the caller with the user interface.

35. (Currently amended) The computer program storage ~~distribution~~ medium of claim 28, further comprising: displaying a selection mechanism with the user interface, which, when selected, makes a contact to a caller of the selected contact attempt.

36. (Canceled)

37. (Currently amended) The computer program storage ~~distribution~~ medium of claim 28, the storage ~~distribution~~ medium comprising a computer readable medium, ~~a program storage medium,~~ a record medium, a computer readable memory, a computer readable software distribution package, and a computer readable compressed software package.

38. (New) The subscriber terminal of claim 1, wherein the user interface is configured to present the unanswered call data together with content of the at least one saved text message.

39. (New) The arrangement of claim 10, wherein the presenting means is configured to present the unanswered call data together with content of the at least one saved text message.

6

40. (New) The method of claim 19, wherein presenting the contact attempts comprises presenting the unanswered call data together with content of the at least one saved text message.

41. (New) The computer program storage medium of claim 28, wherein presenting the contact attempts comprises presenting the unanswered call data together with content of the at least one saved text message.
